1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1,2,7-10,19 are rejected under 35 U.S.C. 102(e) as being anticipated by Hyde, Jr. 6,038,553. Hyde, Jr discloses a check cashing method at an ATM (col 4 line 55+). It is disclosed that each customer is identified by a unique check cashing member number (col 4 line 23+). It is disclosed that a user places a check (note) into the machine, the transaction machine captures an image of the customer (biometric) and of the check and transmits the scanned images to a server (col 4 line 65+). Information entered by the customer and MICR information is also read and transmitted to the server (col 5 line 10+). It is disclosed that the server dispenses cash depending upon a validation check by the machine (col 5 line 30 – col 8 line 49+)

3. Claims 3-6,11-18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. The following is a statement of reasons for the indication of allowable subject matter: the prior art of record fails to teach or fairly suggest to one of ordinary skill in the art, in conjunction with all the other claimed limitations, the comparison of the serial number to a serial number previously stored as in claim 3 and any claim that

depends from claim 3; the providing to the user at least one non-cash document upon receiving a request from the user as in claim 11 and any claim that depends therefrom.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Shah 6,129,273, Creekmore 4,109,238, Lipkin 5,592,377, Granzow et al 4,617,457 and Gustin et al 5,897,625 all disclose customer validation methods at transaction terminals.
